

Methu Perera

Software Engineer

PROFILE

Software Engineering undergraduate passionate about Artificial Intelligence, Machine Learning, and software development. Experienced in Python, deep learning, data preprocessing, and building ML projects through academic and personal work. Eager to grow in LLMs, Generative AI, AI agents, and ethical AI through a structured internship opportunity.

WORK EXPERIENCE & PROJECTS

Employee Stress Tracker

Python · Deep Learning · Desktop Application · Superbase
<https://github.com/JEROME-2005/Employee-Stress-Tracker>

- Developed a machine learning model to detect employee stress patterns.
- Built a desktop application integrating the DL model with a user-friendly interface.
- Utilized Superbase for data storage, authentication, and monitoring.

Dementia Tracker System

Python · Jupyter Notebook · HTML · CSS · JavaScript
<https://github.com/JEROME-2005/Dementia-Tracker#>

- Designed and trained a dementia risk prediction model using scientific Python libraries.
- Built an interactive frontend to visualize predictions.
- Implemented preprocessing pipelines for accuracy improvement.

ConstructAI ERP System

JavaScript · Java · React · Tailwind · Vite · Spring Boot
<https://github.com/JEROME-2005/ERP-Construction-Web-Application>

- Developed ERP modules including user management, inventory, finance, project tracking.
- Built responsive UI using React, Tailwind, Vite and Implemented backend services with secure Spring Boot APIs.

EDUCATION

- **National Institute of Business Management**
BSc (Hons) Computer Science with Software Engineering - In Progress
- **General Certificate of Education (Ordinary Level) - G.C.E. O/L**
The Department of Examinations of the Ministry of Education

SKILL

- **Programming Languages**
Python, Java, C++, JavaScript
- **Frameworks & Tools**
Git, Docker, Nodejs, React, Flask, Vite, Tailwind
- **Machine Learning & AI**
TensorFlow, NumPy, Pandas, OpenCV, Mediapipe
- **Databases**
MySQL, Oracle, Firebase, Supabase

AWARDS

University Projects & Hackathons

- Participated in hackathons focused on software engineering, ML, and cloud deployment. (Model X)
- Completed multiple real world impactful university projects.
